

## **MIKE BROOKS NAMED PRESIDENT AND CEO OF THE SCRUGGS COMPANY**

**March 8, 2022 – Houston, TX** – The Scruggs Company, a legacy supplier of valves, actuation, and value-added services to the Texas water utility industry, is pleased to announce the appointment of Mike Brooks to the position of President and CEO. Mike takes the reigns from Jimmy Scruggs, who will remain with the company as a technical consultant and management advisor.

Scruggs was acquired in October 2021 by RoX Capital. According to Mark Sparrow, Managing Partner, the leadership transition at Scruggs is an excellent example of mindful succession planning and strategic growth.

"Jimmy Scruggs and his family have been supplying quality products and services to the Texas water utility industry for more than seven decades. We intend to build on this foundation by bringing Mike Brooks on board. We believe that Mike's experience and seasoned leadership will honor the work of the Scruggs family by further developing the company's product and services portfolio and expanding the company's market reach.

Mike brings to Scruggs his experience of more than 20 years as a senior executive with several Fortune 500 companies servicing the global energy sector, including GE Oil and Gas, Cameron International, and SPX Flow.

Mike is thrilled to be a part of Scruggs's future. "Scruggs is a brand that holds an important place in the Texas water utility sector. Our plan going forward will be to understand, in detail, the short- and long-term valve and actuation requirements of our utility partners and build an organization that can respond quickly and with high-quality products and services."

### **The Scruggs Company**

The Scruggs Company is a distributor, service provider and manufacturer's representative of valves and actuation products for Texas' water utility sector. With offices in Austin, Dallas, and Houston the company maintains one of the largest inventories of valves in the region. As a proud member of AWWA (American Water Works Association) we offer valve, actuation, and service solutions for a broad range of liquid handling challenges.
