NO. FMB201229

To: Flygt Distributors
From: Lisa Riles and Josh Voigt
Subject: New Generation Flygt SUBCAB®
Date: October 23, 2012

Dear Valued Flygt Distributors:

In November of 2012, we will be converting to the new generation of Flygt SUBCAB® cables. These cables are specially designed to provide a long and dependable service life for Flygt submersible pumps and mixers, and contain a twisted shielded pair of control conductors and improved conductor insulation material composed of High Density Ethylene Propylene rubber, HEPR. The changes result in several improvements including smaller outer diameter, reduced weight and a completely new shielding cable assortment.

The new SUBCAB® assortment includes:

Type

SUBCAB® power cable with control conductors

- 4 conductor 10 – 120 mm²
- 7 conductor 6 mm²

SUBCAB® shielded power cable with control conductors (suitable for use with VFD ie Flygt Exporior™ SmartRun™)

- 4 conductor 1.5 – 185 mm²
